49 Agnes Street, East Melbourne, VIC 3002

### Upgrade Your Community

Replace aging duress, phone and security systems with one simple device that does it all. Easy for staff and residents to use, Lumin reduces infrastructure costs, improves operational efficiency and brings communities closer together.

## EASIER VILLAGE LIVING

### Lumin is a digital portal to a better lifestyle

Give your residents the benefits of digital technology, minus the confusion. No complex infrastructure is required to offer duress alarms, smart home and VOIP/PBX facilities within your organisation.

Lumin has also been designed to enhance communication between staff, residents, their friends and family members.

Lumin makes it easier for everyone to stay in touch and engage with the people who matter.

### INSTALLED IN MINUTES

Simply connect the power cable and you're good to go! Lumin Smart-Hub is 100% wireless, with seamless fallback to use 4G data in the event of a network outage.

The entire system is remotely managed, making updates and maintenance a hassle-free experience for staff and residents.

## ALL OF THE ESSENTIALS

### ⚠ Duress Alarms

Using voice, a pendant or wall mounted button, residents can easily call for help 24/7. The alarm allows you to upgrade your existing duress system to 4G in time for the 2024 3G shutdown.

### 📣 Security & Access Control

Get an intercom and access control system for residents and visitors to your village. Lumin also includes logging and reporting to ensure a seamless audit trail for security compliance.

### ☎ Phone System

Ditch the hassle and expense of maintaining a dated VOIP/PBX system. Smart-Hub comes with its own phone number, a one click phone book and a large dial pad for calling any number. It can even be connected to a traditional handset.

## PLUS THE EXTRAS

It's not just about the hardware, Lumin Smart-Hub comes pre-loaded with apps designed to compliment your residents' lifestyle experience.

Easily advertise village services and excursions, streamline meal ordering and menu management, promote recreational opportunities and give residents and staff the freedom to engage with each other directly.

- ✓ Medication reminders and tracking
- ✓ Voice operation and easy touch interface
- ✓ Control lights, blinds, doors and more
- ✓ Village event promotion and bookings
- ✓ Personally tailored news and radio
- ✓ Community and family photo albums
- ✓ Shared family calendars
